HW1b Grading FAQ

Thank you for your questions! Please see answers to some of the most frequently asked questions below:

- **All grades are now posted.** There was a bit of a delay after we posted the announcement, so please check again if you haven't already.
- **Test cases are now posted.** Please look in DEN under HW1b for the grading_cases.zip. It has the input and correct output files.
- **Please follow the steps in the screenshots below to view your grading reports.** The grading report tells you which cases you failed, and which ones you passed. Please click what is highlighted in red until you see the report shown in Fig. 3.

- **Each of the 50 test cases is worth 2 points**, so if you received a grade of 2, as in Fig. 1, that means you got one test case correct. You can also see this in Fig. 3, which shows that case 43 passes, and gives you 2 points.
- **To know whether your code failed due to timeouts or incorrect answers**, the grading report will either say "Time out" on the next line, in which case you failed due to timeout, or it will just say "Fails", in which case it failed due to an incorrect answer. Fig. 3 is labeled in Fig. 4.

- **There are many different techniques to solve this problem**, and it's up to you to determine which one is the best.
  - ○ **If you have questions about your solution approach**, you may stop by office hours to discuss the process.
  - ○ **It is up to you to check why your test cases failed based on the information provided in the grading report, and the test cases/solutions provided on DEN.** You are welcome to come to office hours to ask questions about your solution approach.
